

SABRETOOTH TECHNOLOGIES

SabreTooth Technologies offers an integrated, comprehensive software suite that is designed specifically for a university's complete hospitality needs

Catering

Fully integrated catering solution and event management software. Seamlessly manage any food service event, from coffee service to a complex multi-day conference, with our modern, easy to use software solution.

Guest Accommodations

With the ability to fully integrate with all other Hospitality Hub modules, Guest Accommodations gives you the opportunity to manage and control aspects of your organization from reservations to invoicing.

Conference Services

The Conference Services module provides you with the ability to keep track of every detail within a conference or event. Beginning from the first conversations through to payment, your customers will receive the highest care and attention.

Online Registration

Give your attendees the ability to register online and keep their contact information in one place. Customize your website to easily guide the customer through their respective ordering cycle.

Reporting

All activities related to any event or service can be easily captured and consolidated, allowing you to design and create custom reports in the format you prefer.

If you would like more information on  please reach out to SabreTooth today. We provide comprehensive demos in person or online via GoToMeeting.
