GardenChef Microgreen & Herb Growing Cabinets

Farm-to-table redefined

A Sustainable Cabinet - Promote clean eating and reduce your carbon footprint by growing herbs and microgreens right in your kitchen.

Features & Benefits

- It's health conscious: promotes the use of fresh, nutritious and local ingredients
- It's economical: saves on the cost of buying greens and having to discard spoiled ones
- It's eco-friendly: saves on shipping and packaging
- It provides greater flexibility to customize your menu as you like, and to grow indoors all year round
- It's easy to operate: just set it and it takes care of the rest
- It's available in two-door, single-door and undercounter sizes

More Info

How it works

The GardenChef is equipped with a fully automated ecosystem that allows the operator to easily program lighting and watering. It comes with 39 preprogrammed cycles for the most common greens, PLUS you can add your own.
