

HOSHIZAKI

MODwater

Water Dispenser
More Choice Without the Plastic

A Sustainable Water Dispenser - Providing hydration from a smaller footprint while offering a variety of choices: cold, hot, alkaline & sparkling water.

Features & Benefits

- It's eco-friendly: effectively reduces pollution by discouraging use of disposable plastic jugs, bottles & non-biodegradable foam cups
- It provides more choice and promotes a healthier lifestyle by offering water beverage options including alkaline and sparkling water
- It's "Zero mile water": it does not require transportation and does not need to be refilled
- It saves money: unlike water bottles and water coolers there aren't any storage costs or delivery fees
- It's efficient: no operation labour costs, small footprint
