

Sanitization and Disinfecting using heat and a Spectank

✓ *The Spectank sanitizes at 85°C.*

Highest efficacy against:

- Bacteria
- Protozoa
- Virusus
- Fungi
- Parasites

Scientific basis for the efficacy of boiling

"Viruses are inactivated at temperatures between 60 °C and 65 °C, as temperatures increase above 70 °C, a greater than 99.999% reduction is achieved in less than a minute."

World Health Organization

BENEFITS OF THE SPECTANK SYSTEM

Efficient - The Spectank simply *cleans* and *sanitizes* at the same time.

Cost Effective - Equipment replacement cost, labour hours, chemical costs, natural resources, hydro, cleaning materials etc.
