

DESIGNED FOR FOOD SERVICE OPERATORS

How it works

Traditional methods of managing back-of-house operations are rife with opportunities to miscommunicate, misplace, and outright forget important information.

In contrast, OwlOps gives you all the tools you need to record, monitor, and fulfill every task you need accomplished.

Need to get that leaky sink fixed? It's as simple as a text or email - with a lot more accountability.

Easy as 1-2-3

1. Create a Task

Open the OwlOps app, pick a location from the main dashboard, and choose the type of task you want to create (Fix, Need, Do, Log, Project, Checklist). Easily assign it to a team member and fill out any necessary details.

2. Save and Communicate

Save the task and it automatically notifies the person responsible via text or email. Easily see who has viewed the task, monitor progress, send reminders, and change the status until the task is completed.

3. Get More Done

Get your time back. With all the time and effort saved by you and your team, you can focus on higher level needs.
