

Smallest Most Efficient Kitchen in the World

Naboo+Neo+Nabook—now there really are no limits

LAINOX®
DEVICE FOR COOKING

Just Duet™ with Canada's Best Combination

There's never been a combination like Naboo and Neo. Together they are a smart kitchen platform that takes a commercial food service operation to an entirely new level of simplicity, efficiency and profitability.

Operates Like You Do

Naboo and Neo are smart. High-definition touch-screen GUI is beautifully designed and 'tap, drag and drop' easy to operate. Both connect with cloud-based remote menu management, monitoring and diagnostics across multiple units, locations and devices.

Puts Time On Your Side

Naboo and Neo work overnight. Which means chefs have less to do the next day. Breads proofed perfectly by Neo and ready to go in Naboo—already at temperature. Meats roasted and held to perfection. Awesome power and flexibility for chefs who will love how much less they have to worry about and do!

Nabook: Menu management made easier

Nabook is a comprehensive and integrated menu management application. Menu ideation, creation, costing, planning, production, perfection! Profitability too. Integrates seamlessly with Naboo and Neo. Or, as a stand alone application that's free for chefs and operators to use!

Both Naboo and Neo feature 'tap, drag and drop' easy to use high definition touch screen controls.

Naboo, Neo and Nabook combine to create a truly intelligent kitchen in a fraction of the space a traditional kitchen would normally require.
