

# BOTTLES MADE FROM BOTTLES

---

# 100% RECYCLED

This bottle is green. In more ways than one.

- Our bottles are made from 100% recycled plastic
- We have the lowest carbon footprint when compared to other plastics, aluminum, glass and corrugate packaging
- Local Canadian Supplier across Canada
- Our green water bottle keeps an additional 5 million pounds of plastic out of landfill each year
- Our water is sourced from natural springs across Canada
- Our certified spring water is naturally filtered and rich in minerals.

# Our Assortment

## Our bottle is only part of the story.

- We are the first beverage company in North America to operate a recycling facility in a closed loop – from curbside collection, to recycled bottle manufacturing, to fresh natural spring water products...and back again.
- **We are a Canadian family owned and operated company since 1995**
- We opened BMP Recycling Facility in 2010 to produce our own food grade resin
- We have been zero waste to landfill at all of our bottling facilities since 2017
